

European Space Weather Week 2025

27–31 October 2025 in Umeå, Sweden

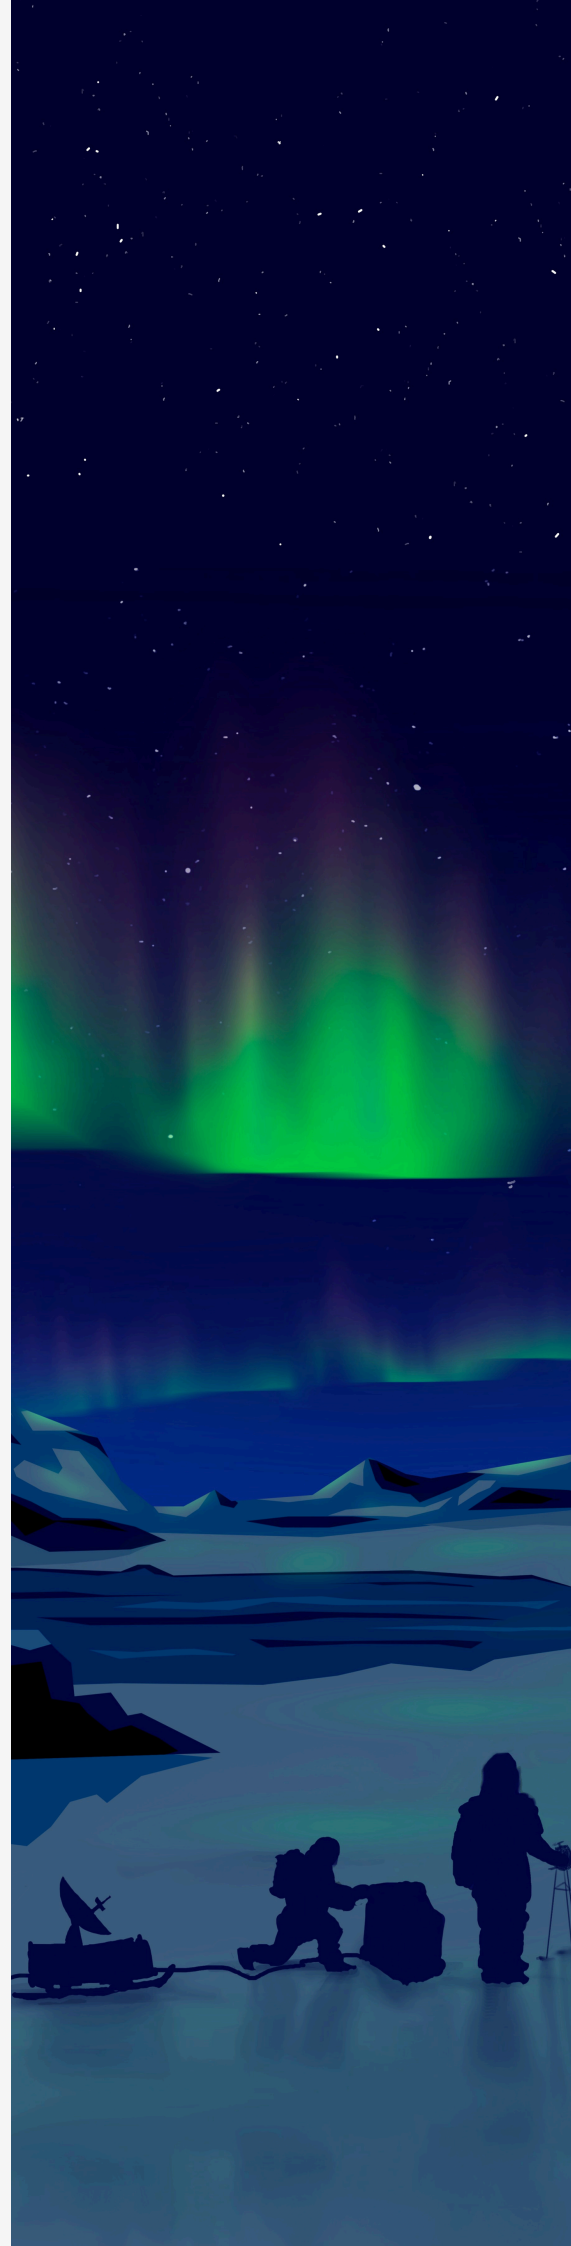

www.esww.eu

Welcome to the 2025 European Space Weather Week (ESWW) in Umeå, Sweden!

This hybrid event offers a dynamic program, featuring high-quality presentations, interactive discussions, poster sessions, an exhibition, a fair, and ample networking opportunities.

ESWW unites a global community, including scientists, engineers, operators, and practitioners from various sectors impacted by space weather and space climate. This includes satellite operators, power grid technicians, communication and navigation specialists, aviation professionals, space weather service providers, and educators.

With a strong interdisciplinary focus, ESWW fosters the exploration of innovative technologies and approaches to address space weather challenges. The event provides a platform for knowledge exchange on all aspects of space weather and space climate, including forecasting, risk assessment, impacts on space operations, and the broader socio-economic consequences for Earth and its inhabitants.

Sponsorship Package

We invite sponsorship from organizations within the space sector, those impacted by space weather (e.g., satellite operators, aviation, marine, power grids, communications, navigation), and those supporting scientific research (e.g., machine learning, AI, space materials, space tourism).

By collaborating, we can enhance our understanding of solar activity and its impact, improve space weather forecasting and nowcasting, and strengthen global engagement.

Sponsorship helps cover event costs, enabling wider participation and fostering community growth.

■ Sponsorship Package

18750 SEK
including 25% VAT

- 1 complimentary registration to attend ESWW, including coffee breaks, the welcome reception, and the music night.
- Exhibition stand centrally located for the full week including the space weather fair
 - 2x1m floor space (without walls)
 - 1 conference table & chair
 - Electrical outlet & wifi
